MARINE CORPS AIR STATION
CHERRY POINT, NORTH CAROLINA 28533-5001

IN REPLY REFER TO:

6280

LN

19 Jun 92

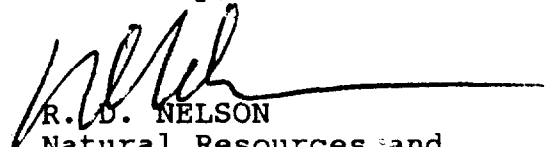

Mr. John Lank, Jr., P.E.
Chief, Resources Conservation and
Recovery Act Compliance Section
345 Courtland Street, NE
Atlanta, GA 30365

Dear Mr. Lank:

Your review of the Marine Corps Air Station (MCAS), Cherry Point Resource Conservation and Recovery Act (RFI) Workplan for additional work at Units 10 and 16 resulted in approval of the workplan and schedule of implementation contingent upon two modifications. One of the modifications required bailers to be constructed of fluorocarbon resin material. As discussed in the conference call between you and Mike Arnett of your staff, Renee Henderson of the Natural Resources and Environmental Affairs Department, MCAS Cherry Point and Jim Steinburg of Atlantic Division, Naval Facilities Engineering Command, Norfolk, Virginia, we propose to use stainless steel bailers during the field investigation to maintain consistency in the equipment used to collect groundwater samples. Stainless steel bailers have been used throughout the field investigation at these units to date.

We plan to begin the field work on June 27, 1992. Should we not receive a response prior to initiating the field work, we will assume your concurrence on this matter. If you have questions or require additional information, please contact Ms. Henderson or myself at (919) 466-4598/3631.

Sincerely,

R.D. NELSON
Natural Resources and
Environmental Affairs Officer
By direction of the
Commanding General
